HEAD PRO PLAYERS MAY PLAY WITH DIFFERENT RACQUETS FROM THE MODEL SHOWN.

WE ARE A **PADEL** BRAND AND NOT A TENNIS BRAND DOING PADEL

Everyone knows us for being experts at tennis, but did you know, we're also experts at padel?

Our highly experienced padel division have been making world class equipment and apparel for players for over 20 years.

So what better way to celebrate our passion for this sport we love than by introducing an exciting, totally new look for our padel brand identity.

This new identity boldly asserts that padel is part of our heritage, and that we can elevate every players game.

HEAD® PADEL

PADEL FACTS

SHAPES

We offer racquets in diamond, teardrop and round shape. The shape helps to determine a racquet's playing characteristics.

DIAMOND SHAPE

- Sweetspot further away from the grip
- More power
- Less maneuverability

-> **FOR OFFENSIVE PLAYERS**

TEARDROP SHAPE

- Sweetspot in the center
- Balanced power & control
- Bigger sweetspot

-> **FOR OFFENSIVE & DEFENSIVE PLAYERS**

ROUND SHAPE

- Sweetspot closer to the grip
- More control and precision
- More maneuverability
- Bigger sweetspot

-> **MOSTLY FOR CONTROL PLAYERS**

FOAM

The foam stiffness, defined by the material density, influences the performance of the racquet. HEAD features the following foams in its racquets:

POWER FOAM

Power Foam is the perfect ally for maximum power. The speed your ball will reach will surprise your opponents as much as yourself.

SOFT FOAM

Soft Foam features an ultra-fast memory that maximizes sweetspot and comfort when hitting.

COMFORT FOAM

Comfort Foam is the ideal pick for the player who wants maximum comfort. It also absorbs the vibrations at the same time as increasing the power of your shot.

CONTROL FOAM

Control Foam enhances the sweetspot and feeling when you strike the ball. Exceptional control you can feel with every shot.

PROTECTION

Special polymer foil increases the durability of the racquet, protecting it from bumps and scratches.

The Integrated Protector is a pre-molded carbon bumper that protects your racquet from chips and scratches, which extends the lifetime of your racquet.

DRILLING PATTERN

The number, size and position of the holes change the performance of the racquet, with a direct impact on control and power.

QUANTITY
More holes = hitting surface deflects more
-> **FOR MORE POWER**

SIZE
Bigger holes = hitting surface deflects more
-> **FOR MORE POWER**

POSITION
Fewer/smaller holes in the sweetspot area
-> **FOR MORE CONTROL**

The identity of every racquet is unique; some are characterized by control and precision, others by power or spin. For this, HEAD has developed the Optimized Sweetspot in order to adapt every drilling pattern to the particularities of each racquet.

FRAME

Every single racquet has its own DNA. Some will feature control and precision, other power or comfort. For this reason, HEAD has developed the Smart Bridge to adapt the bridge area to the needs of each racquet.

We have the know-how to develop specific and unique constructions of the bridge area to deliver different benefits and performance.

Every tube section is individually constructed to achieve the best performance for each racquet.

HITTING SURFACE

The type and combination of materials used in the hitting surface affects how a racquet performs. Different materials can deliver totally different playing characteristics, even if the specs (shape/weight) are similar.

Extreme Spin is a rough surface that multiplies the extreme spin on the ball.

CARBON FIBER
Higher stiffness during impact
-> **FOR MORE CONTROL**

HYBRID WOVEN
Benefit of both materials
-> **FOR MORE CONTROL & POWER**

FIBERGLASS
More flexibility/softness during impact
-> **FOR MORE POWER**

AUXETIC

AUXETIC SENSATION

Feel every shot and get more confident in your game with HEAD Auxetic technology. It actively responds, giving real-time, super-accurate feedback. It really is sensational.

WHAT IS AUXETIC?

Auxetic constructions show a unique deformation compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions widen when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction.

WHERE IS AUXETIC LOCATED?

Auxetic is designed to react to ball impact and give the best impact feel by adapting its internal structure. Based on extensive research, we optimized its placement in the carbon fiber engineered yoke piece of the racquet.

WHAT IS THE BENEFIT OF AUXETIC?

Auxetic actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a big force is applied to the yoke piece, caused by the hitting surface pulling it towards the center of the racquet. Depending on where the ball hits the surface, the force of the impact will be applied at different locations in the yoke piece.

GRAPHENE INSIDE

Strategically positioned in most of our racquets, Graphene strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE INSIDE.

PADEL FACTS

FIND THE PERFECT RACQUET FOR YOUR INDIVIDUAL PLAYING STYLE.

What primary benefit are you looking for in a racquet: POWER, CONTROL or BOTH?
What is your preferred racquet balance: HEAD LIGHT, HEAD HEAVY or EVEN?

BALANCE-WEIGHT DISTRIBUTION

Due to their length and geometry, padel racquets tend to be head heavy. A racquet's balance tends to have a direct influence on its power and maneuverability.

HEAD HEAVY = more power = TOURNAMENT
HEAD LIGHT = more maneuverability = RECREATIONAL

The head shape, together with the HEAD-engineered weight distribution, determines the balance of each racquet.

RACQUET WEIGHT

340g - 360g: mostly recreational/intermediate players
360g - 375g: mostly tournament/professional players

BUT: Some more advanced players, as well as some professionals, play with lighter racquets because of the faster handling and reduced physical strain on the arm. And some beginners use heavier racquets for a more solid feel and easy power.

EXTREME ONE RACQUET

EXTREME ONE RACQUET

NEW

Join the Revolution

A revolution in padel racquet design with only one hole, the premium EXTREME ONE has a state-of-the-art 12K carbon see-through hitting surface that is remarkably durable. The lightest racquet in the EXTREME series is also the strongest and offers both power and consistency.

FOOTWEAR TECHNOLOGIES

COMFORT

ORTHOLITE®

With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

HEAD COOLING SYSTEM

Perforations in the outsole, midsole and sock-liner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

SOCK SUPPORT SYSTEM

Fully integrated elastic sock construction for initial comfort and better support.

STABILITY

DELTA STRAP

Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD LATERAL CONTROL+

Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

HEAD LATERAL CONTROL

HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

DURABILITY

HEAD HYBRASION+

A special rubber compound developed for padel shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

HEAD HYBRASION

Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD TRI-NRG

HEAD's complete support technology. First, NRG Neutralizes impact in the heel area, then it is Rigid in the midfoot area for excellent torsional support properties and densities in each area of the shoe are key elements in this HEAD footwear technology.

DYNAFOAM

Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

HEAD LOCKDOWN STRAP

Midfoot straps integrated into the lacing system keep your foot in place.

HEAD HEEL STABILIZER 180°

TPU Brace that wraps around the heel for best fit and support.

HEAD T-KORE 360°

Highlighted by the shoe's design, HEAD T-KORE 360° brings together the performance technologies that ambitious players need. The innovations give your shoe a core strength, with enhanced stability, abrasion resistance and torsional support.

SUPERFABRIC®

Extremely abrasion resistant and at the same time really flexible upper material.

HEAD DRIFT DEFENSE

In order to have a complete durable shoe, the upper of a padel shoe needs to be durable as well, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defence technology to protect this area during aggressive toe drags.
